

GROUND AND POWER STRAPS

JE Engineering offers:

- ◆ Tinned ground/power straps available in unlimited configurations and gauge equivalents.
- ◆ Bulk wire or custom assemblies manufactured to order for: frame ground, battery interconnect, custom assemblies for relay and solenoid connections, shielding, etc.
- ◆ Flat and tubular wire braids with range from 1/32 to 3 inches wide.

- ◆ Bare copper, tinned copper, nickel plated copper, silver plated copper and more.
- ◆ Continuous stranding terminations on assemblies for optimal electrical connection and mechanical strength.

Consult Julian Electric Engineering for samples, specifications, application specific options, and gauge equivalent charts.
